General Information about Industrial Alarms....

- ❖ **Plant alarms** are intended to notify **plant employees** about events inside their fenceline
 - ❖ They consist of various sound patterns that communicate information to plant workers
 - ❖ Plant workers are trained to respond to in-plant alarms
 - ❖ In some cases, the nearby residents can hear in-plant alarms
- ❖ **Community alarms** are intended to notify nearby residents of events that could be of concern to the public. They are installed by **municipalities** and cover several situations.

Community Alarms & Test Schedule

Shoreacres and La Porte -- Test at Noon on Saturdays
Pasadena - Tests at 6:00 - 6:30 PM / First Thursday of the month
Seabrook and El Lago -- No Sirens
